SUMMARY

Highly motivated software developer with 4+ years of experience in AI, Cloud and Embedded systems. Recently graduated with a Master's degree in Computer Science from National Taiwan University. Possess internship experience at LINE Corp developing large-scale systems. Founded and led the Developer Student Clubs, demonstrating a passion for knowledge sharing and fostering collaboration within the tech community. Proven ability to solve real-world problems efficiently through participation in hackathons. Maintain a technical blog with over 150+ articles since 2017.

EDUCATION

Master of Computer Science, National Taiwan University

2021-2024

Overall GPA: 4.12/4.3

Coursework: Blockchain and Big Data, Introduction to FinTech, Computer Vision

Publication: 2023 IEEE International Conference on Metaverse Computing, Networking and Applications

EXPERIENCE

Software Developer Intern

2022 - 2022

Line Corporation (95M MAUs worldwide, social media company in Asia)

Taipei, Taiwan

- Solve the data inconsistency issues across teams and increase API development time by XX% by designing a service utilizing Swagger, auto-gen types, and Kubernetes deploy with DNS/LB.
- Led 5 developers to build an NFT merchant management system with NextJS and Spring Boot in Hackathon.
- Gave a talk on Ethereum & dApp development in the study group.
- Developing a large scalable system using Nx and collaborating with the global team.

SELECTED PROJECTS AND COURSES

Decentralized Ticketing System - Master's Thesis (Web3 FullStack)

- Reduced price fluctuations by 9X%, eliminating scalper's profit (1XX%), by stimulating the market, writing 3 ticketing strategies and analysis using SQL.
- Developed a full-stack web3 project that includes a smart contract, website, and mobile app using Next.js, React Native, and Solidity with 9X% BDD code coverage.
- In progress: Add Fixed Price ticket purchase feature with Apache Kafka.

Drum.io - Course Project

- Won 1st place in a competition with 50+ votes by developing a trainable air drum game using TensorFlow.js, Arduino, and WebSockets.

Smart Recommended Shelves - Hackathon Project

- Developed a recommendation system using facial and gaze detection, by using Tensorflow and OpenCV.
- Built smart shelves with Firmata and Arduino.

Smart Potting System - Side Project

- Developed a smart potting system using Linkit7697 and sensors to provide an Android app for the elderly that can pair and communicate with their plants using Bluetooth and NLP.

Certified Developer MLOps Professional by Intel - Course

Create your dancing robot - Course Project

- Won 1st place in a competition with 52 votes for developing a model control system using OpenGL.

HONORS

Research Excellence Award - Honored for top 1% research & graduation.

Intel Andy Grove Scholarship - Top 18%(367 selected) applicants worldwide for academic and leadership potential.

College Student Research Scholarship - Awarded by Ministry of Science and Technology, Taiwan.

Robot Design Competition - Awarded 1st place and leading team of 4 in competitive event (30+ teams).

EXTRA-CURRICULAR ACTIVITIES

Lead of Developer Student Club - Selected as one of 800 leaders from a pool of 3000+ global applicants, I led a team of 73+ students and delivered talks on machine learning, PoseNet, Python & Colab, and Flutter.

Volunteering

- Provided technical support at the ART FUTURE exhibition showcasing blockchain applications.
- Assisted with Developer Student Club (DSC) and Google Developer Groups (GDG) events at SITCON(Student Information Technology Conference) and COSCUP(Conference for Open Source Coders, Users and Promoters).

SKILLS

- Artificial Intelligence(Generative AI, LLM, RAG, NLP, CV, ML/DL, Data Analysis), Web(Frontend/Backend) Development, Cloud-Native Applications, Socket, Chrome Extension, SSG/SSR, MVC, TDD/BDD, AWS, CI/CD, Web Crawling, PWA
- Python, C/C++, JavaScript/TypeScript, Golang, Java
- LangChain, Huggingface, ChatGPT, MLflow, Tensorflow, Scikit-Learn, OpenCV, OpenGL, Numpy, Pandas, Matplotlib, Swagger, FastAPI/Flask, NodeJS, Express, Nx, React(NextJS, React Native), Selenium, Playwright, Mocha, Kafka, Spark, Kubernetes, Grafana, Android, Terraform
- NoSQL(MongoDB), SQL(PostgreSQL, MySQL), Vector(Weaviate)
- Raspberry Pi, Arduino, Linkit
